

STATE-OF-THE-ART CLEANING & COVID-19 PREVENTION

At Brooke Grove Retirement Village, we are committed to protecting our residents and staff from the spread of COVID-19.

We are taking strict steps to maintain a safe environment and rigorously adhering to recommendations from national and local health authorities.

WE HAVE ADDED THE FOLLOWING NEW PREVENTION AND CLEANING MEASURES TO OUR ALREADY STRINGENT DISINFECTION AND SANITIZATION PROCESS AND HEALTH PROTOCOLS. ALL PRODUCTS ARE SAFE AND ENVIRONMENTALLY FRIENDLY.

- **Fresh-Aire UV[®]** ultraviolet germicidal irradiation system disinfects HVAC systems to sterilize and reduce the transmission of airborne bacteria and viruses
- **activTek Mini EM[®]** for mini-split HVAC units uses light waves and a catalytic process to reduce air pollution, surface contaminants, odors and dust
- **Victory** professional cordless electrostatic handheld sprayer provides excellent coverage for disinfecting and sanitizing surfaces
- **Bru-Clean TbC 2[®]** cleaner-disinfectant penetrates biofilms and kills a host of bacteria and viruses for effective broad-spectrum coverage on all surfaces
- **PURE Hard Surface** high-contact disinfectant with SDC (silver dihydrogen citrate) quickly kills bacteria and viruses and has 24-hour residual action
- **Point-of-Care Testing** for COVID-19 provides rapid results and allows for an immediate response
